**Subject:** conflict for 11am today - update on CEA

Hi Valois and Douglas,

I apologize—I had a conflict come up and won't be able to make the DB meeting at 11 am today.

A quick update on the status of the CEA RTC and CEA document. Of the list of materials we went over a few weeks ago we've got these things done:

- Non-ESA species: RTC and new section in CEA completed.
- Climate change/GHG: RTC and CEA updated
- Cultural resources RTC: near-final

To do:

1. Surfacewater/groundwater RTC/CEA edits
2. Cleanup/incorporation of above to RTC document
  - a. I will upload it to the larger working document of all the RTCs. This uploaded version would be near final but will contain a couple comments that still need to be addressed as placeholders.
3. CEA edits regarding the scope. This will include a couple placeholders including for the surfacewater/groundwater section.

I plan to complete 2 and 3 today. I defer to the team on when management would like to start reviewing the CEA and RTC. As discussed, I'll send around a brief document that captures the changes we made from the briefings in preparation for that timing.

Please let me know if you have any questions. Thanks!
